

IEEE CCWC 2021 IoT Workshop

Blockchains With Virtual Raspberry Pis

2020-12-27

Phillip G. Bradford¹

GOAL

Showing how to compute pseudo-blockchains using virtual Raspberry Pis.
These are not blockchains, but they are a related clockchain structures.

SUBGOALS

Basic principles of distributed computing and consensus

Basic principles of digital money

¹ University of Connecticut, Stamford, CT USA, phillip.bradford@uconn.edu, phillip.g.bradford@gmail.com

METHODS & TOOLS

QEMU virtual machines supporting ARM Raspberry Pis

MacOS

Windows 10

Python 3 and Python libraries
